Dear

STAT
STAT

This paper is the product of six months research and writing as well as numerous conversations with experts on defense analysis and arms control, ASW and naval affairs. Some of the institutions these individuals are employed by include the Department of Defense, the U.S. Navy, the Brookings Institute, the Arms Control and Disarmament Agency and the Massachusetts Institute for Technology. I am also currently working on two additional papers for publication, one on Soviet ASW and its implications for U.S. sea-based nuclear forces and the other on operational ASW arms control measures.

Since I am also seeking employment, I have enclosed my resume. I would appreciate any advice you may be able to offer concerning possible employment opportunities, particularly with the CIA.

Sincerely,
